

Highlights from the online consultation *Research for Society*

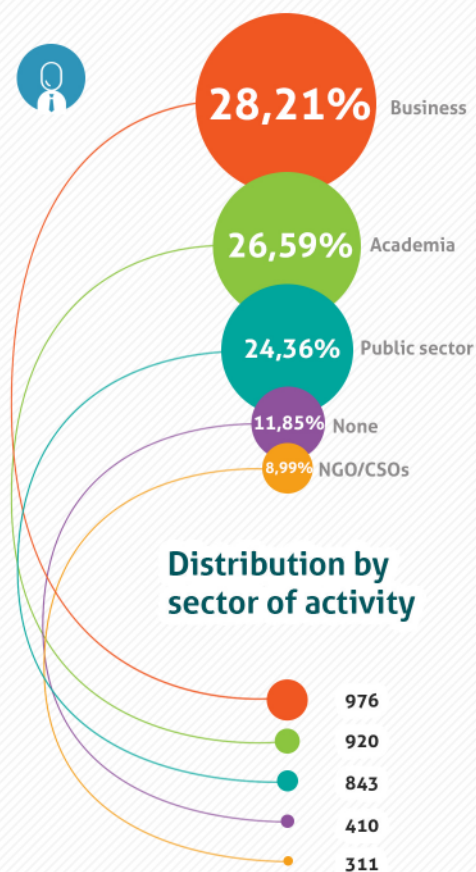

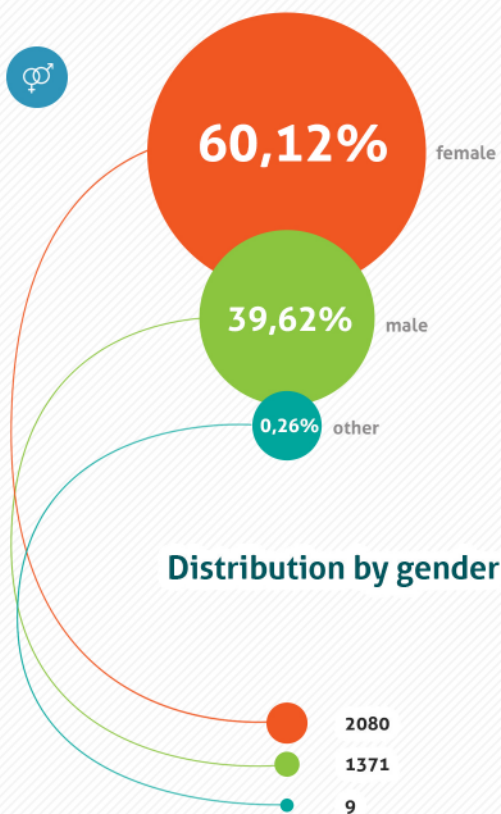

Between August - October 2016, the online consultation *Research for Society* invited citizens from 30 countries to join researchers, stakeholders, policy makers in redefining the European Research and Innovation agenda to make it more accountable. By taking part in this consultation, 3458 respondents evaluated and enriched, according to their interests and expertise, 48 proposed research programs. These were further on explored as policy options, inspiring possible calls and topics for the 2018 and beyond Horizon 2020 work programme.

In the report that follows we share key aspects of the online consultation, as part of the CIMULACT project – Citizen and Multi-Actor Consultation on Horizon 2020.

30 COUNTRIES PARTICIPATING IN THE ONLINE CONSULTATION

<i>Sustainable Economy</i>	15.50%
<i>Equality</i>	12.57%
<i>Strenghts-Based Education and Experiential Learning</i>	9.80%
<i>Citizenship Awareness and Participation</i>	9,38%
<i>Harmony with Nature</i>	8,53%
<i>Holistic Health</i>	8,24%
<i>Personal Development</i>	7,85%
<i>Sustainable Energy</i>	7,08%
<i>Unity and Cohesion</i>	6,65%
<i>Sustainable Food</i>	6,33%
<i>Green Habitats</i>	4,23%
<i>Life-Long Processes</i>	3,78%

TOP 5 PROPOSED RESEARCH PROGRAMMES

by average importance, assigned by Europeans in 30 countries

1 Top trending: at one with nature

Develop approaches for promoting “green” living to encourage more people to adopt ecological life-styles.

2 Ecological future education

Develop training programmes and education on ecology and future-thinking for citizens, policy makers and civil servants to ensure a healthy planet for future generations.

3 Good food research

Intensify food innovation and research and increase public knowledge on sustainability, health and nutrition to affect food behaviours in a positive way.

4 Beyond energy efficiency: reduce consumption through structural design and behaviour

Explore ways to bring about behaviour change and exploit technological innovation and integrated planning to increase energy sufficiency.

5 Quantitative person-centred health

Explore conditions for innovative, personalised and human-centric services for health promotion, prevention, treatment and rehabilitation.

**Universal basic income
– so no-one is left behind**

Investigate ways to successfully implement a universal basic income.

Distributed living

Rethink society's organisation into more distributed sustainable communities that produce and consume locally so there is less need to move people and things.

The bigger (the cities) the better

Assist in making highly dense cities more liveable for everybody.

These are the cases where respondents had highly diverse opinions regarding the importance of the proposed research programmes.

COMPLETE LIST OF PROPOSED RESEARCH PROGRAMMES ORDERED BY AVERAGE IMPORTANCE

Need	Programme Title
Harmony with Nature	<ul style="list-style-type: none"> ● Top trending: at one with nature
Harmony with Nature	<ul style="list-style-type: none"> ● Ecological future education
Sustainable Food	<ul style="list-style-type: none"> ● Good food research
Sustainable Energy	<ul style="list-style-type: none"> ● Beyond energy efficiency: reduce consumption through structural design and behaviour
Holistic Health	<ul style="list-style-type: none"> ● Quantitative person-centred health
Holistic Health	<ul style="list-style-type: none"> ● Access to equal and holistic health services and resources for all citizens
Sustainable Energy	<ul style="list-style-type: none"> ● Enabling a market for energy prosumers
Holistic Health	<ul style="list-style-type: none"> ● Finding a balance in a fast-paced life
Sustainable Food	<ul style="list-style-type: none"> ● Responsible use of land
Strenghts-Based Education and Experiential Learning	<ul style="list-style-type: none"> ● Rethinking (the new) "job market needs"
Strenghts-Based Education and Experiential Learning	<ul style="list-style-type: none"> ● Educational ecosystem as a driver of social innovation and local development
Life-Long Processes	<ul style="list-style-type: none"> ● Deconstruction of age
Sustainable Economy	<ul style="list-style-type: none"> ● Consume less, enjoy more
Sustainable Energy	<ul style="list-style-type: none"> ● Smart energy governance
Equality	<ul style="list-style-type: none"> ● Balanced work-life model
Sustainable Food	<ul style="list-style-type: none"> ● Good quality food for all
Sustainable Economy	<ul style="list-style-type: none"> ● Production awareness
Citizenship Awareness and Participation	<ul style="list-style-type: none"> ● Empowered citizens
Unity and Cohesion	<ul style="list-style-type: none"> ● Alternative economic model
Strenghts-Based Education and Experiential Learning	<ul style="list-style-type: none"> ● Design literacy and life skills for all
Personal Development	<ul style="list-style-type: none"> ● (Business) Models for balancing time
Sustainable Economy	<ul style="list-style-type: none"> ● From Wall Street to Main Street
Life-Long Processes	<ul style="list-style-type: none"> ● Health empowerment through "Everyone's science"
Green Habitats	<ul style="list-style-type: none"> ● Moving together (more collective transports)
Citizenship Awareness and Participation	<ul style="list-style-type: none"> ● The transparency toolbox
Harmony with Nature	<ul style="list-style-type: none"> ● Transforming technologies for planet and people
Life-Long Processes	<ul style="list-style-type: none"> ● I'm empowered to lead my changes
Personal Development	<ul style="list-style-type: none"> ● Personal and organisational choice management
Equality	<ul style="list-style-type: none"> ● Social Economy
Holistic Health	<ul style="list-style-type: none"> ● Promoting well-being through relating environments
Sustainable Energy	<ul style="list-style-type: none"> ● Interconnected open systems
Strenghts-Based Education and Experiential Learning	<ul style="list-style-type: none"> ● SWOT (Strengths, Weaknesses, Opportunities, Threats) Technological empowerment

COMPLETE LIST OF PROPOSED RESEARCH SCENARIOS ORDERED BY AVERAGE IMPORTANCE

Need	Programme Title
Personal Development	• Technology as a means of well-being
Equality	• Empowering diversity in communities
Citizenship Awareness and Participation	• Data for all – Share the power of data
Unity and Cohesion	• Community building infrastructures
Harmony with Nature	• Urban-rural symbiosis
Sustainable Economy	• Learning for society
Sustainable Food	• Evolving food culture in growing cities
Green Habitats	• Freedom to choose where we live
Personal Development	• Meaningful research for society
Citizenship Awareness and Participation	• "Snakes and Ladders". Connecting scales of issues and actors.
Unity and Cohesion	• Evidence-based community building
Green Habitats	• Distributed living
Equality	• Digital Inclusion
Life-Long Processes	• Here, there and everywhere
Unity and Cohesion	• Universal basic income - so no-one is left behind
Green Habitats	• The bigger (the cities) the better

Legend

- Proposed research programmes marked in green are in the top third, by average importance assigned by online respondents
- Proposed research programmes marked in yellow are in the second third, by average importance assigned by online respondents
- Proposed research programmes marked in red are in the bottom third, by average importance assigned by online respondents
