

2. Holistic Health

Dissemination and continuous exploitation of research and innovation in the healthcare system

GRAND CHALLENGES :

C1. Health, demographic change and wellbeing

C6. Europe in a changing world - inclusive, innovative and reflective societies

CHALLENGE

There is a gap of awareness at the local level about the research and innovation achievements at the European level.

In fact, research and innovation actually occur in the healthcare system but they do not come easily available to the local service providers, citizens and other relevant stakeholders. This can be due to the inherent complexity of the system, but also to a lack of dissemination and exploitation.

Therefore, there is a need of doing actual exploitation at a granular level and of creating local awareness, through local actions, about the results of research.

SCOPE

A dissemination and support action should be conceived to spread and exploit results of research in the healthcare system at the national and local levels. This may imply working with local entities and grassroots organisations (organizations, associations, communities, national contact points and companies) to engage people and stakeholders in discussing, adopting and adapting on-going research and innovation achievements. Local funding entities can facilitate the continuous implementation of research results. Best practices at the local level must be identified. The action needs to identify and then to map out the local entities that can be in charge of this exploitation and dissemination activities, in order to understand their responsibilities and capacities. Contextual and infrastructure factors must be also investigated in order to understand how they influence the exploitation.

EXPECTED IMPACT

- Better exploitation of research and innovation at a local level
- Increased availability of services and solutions for the citizens
- Increased awareness of science progresses and achievements
- Better understanding of the role of EU research and innovation programmes
- Improved roles of national contact points

HOLISTIC HEALTH

2 Dissemination and continuous exploitation of research and innovation in the healthcare system

Research topic:

Dissemination and continuous exploitation of research and innovation in the healthcare system

Grand Challenges :

1: Health, demographic change and wellbeing

6 Europe in a changing world - inclusive, innovative and reflective societies

CHALLENGE

There is a gap of awareness at the local level about the research and innovation achievements at the European level.

In fact, research and innovation actually occur in the healthcare system but they do not come easily available to the local service providers, citizens and other relevant stakeholders. This can be due to the inherent complexity of the system, but also to a lack of dissemination and exploitation.

Therefore, there is a need of doing actual exploitation at a granular level and of creating local awareness, through local actions, about the results of research.

SCOPE

A dissemination and support action should be conceived to spread and exploit results of research in the healthcare system at the national and local levels.

Local funding entities can facilitate the continuous implementation of research results. Best practices at the local level must be identified.

The action needs to identify and then to map out the local entities that can be in charge of this exploitation and dissemination activities, in order to understand their responsibilities and capacities.

Contextual and infrastructure factors must be also investigated in order to understand how they influence the exploitation.

EXPECTED IMPACT

- Better exploitation of research and innovation at a local level
- Increased availability of services and solutions for the citizens
- Increased awareness of science progresses and achievements
- Better understanding of the role of EU research and innovation programmes
- Improved roles of national contact points

This research topic was created at the pan European conference, based on other research topics. No online rating and prioritization information available.

CITIZENS' VISIONS

[PL] Vision 1: Healthy Family, Healthy Society (Flower of Life)

"Our vision concerns available, effective and innovative healthcare which is at the heart of a healthy family and society."

[BGR] Vision 6: Evolution in health care

"... Advanced health-care [...] and minimized spread of diseases"

[CYP] Vision 3: Human Rights

"[...] to equal access to issues that we take for granted, such as health, education and retirement."

[FIN] Vision 2: Predictive health tracking

"One's authority over his or herself as well as one's wellbeing increases and all have equal access to health services."

[GR] Vision 6: Five Pillars for human development

"Health: access to health facilities with medical coverage regardless of economic background"

[CYP] Vision 2: A just society oriented towards human rights

"A society that provides equal opportunities for all EU citizens, as well as direct access to a secure health and education system."

[BGR] Vision 6: Evolution in health care

"Health care is free and generally accessible."

[UK] Vision 6: Citizen Empowerment

"People feel empowered to look after their health and well-being themselves. The highest levels of available health/care/education/resources are available for all".
